

Duke®

KP-A2028 Auto Cutter

Technical Parameters >>>>>>>>

Model.NO	KP-A2028	Model.NO	KP-A2028
Cutting Area(w*l)	2000*2700mm	Software	YINENG Cutting Program
Machine Dimensions	6200*3500*2150mm	Control System	YINENG CUT V3.0
Weight	4.2T	Cooling System	Auto Air Cooling System
Max Positioning Speed	60m/min	Sharpen Way	Sharpening Stone System
Cutting Thickness	7/11cm	Max Speed	4500rpm/min
Cutting Accuracy	≤±1mm	Motor & Driver	Servo Drive System
Power	16-25kw	Machine Power	AC380V/ 50Hz
Cutting Style	Straight Knife Cutting	Air Pressure Supply	0.55MPa 160L/min

1 Control System

- Cutting control system CutV3.0 by Yineng-tech.
- Compatible with 98%-clothing CAD software.
- Can realize red light preview.
- Breakpoint recovery cutting function.

2 Electrical System

- Electrical system adopts an automatic control system.
- Large number of imported components effectively protects the stable operation of the equipment.
- Cutting accuracy with high precision.
- Highspeed servo drive system.

3 Transmission System

- Transmission mode adopts high precision rack and gear transmission system.
- High transmission accuracy.
- Stable start and stop, long service life.

4 Cutting head

- Cutter head adopts principle of Japanese system.
- High hardness and light core components head, long service life.
- High stability, guarantee the high cutting accuracy during highspeed operation.

5 Sharpening

- Adopt double wheel rotation sharpening system
- High sharpening efficiency and long service life of the grinding wheel.

Application Industries: Products involved in clothing, home textiles, medical, inflatables, sofas, shoes and hats, luggage, plush toys, car interiors and other applications.
