

Duke®

DY-600LFS/DY-900LFS

Straight Linear Fusing Press Machine

Features:

- This is a continuous type machine therefore production is greatly increased.
- The automatic Belt Warping Prevention Device keeps both the upper and lower belts in the same position.
- Using the feed back system, damage is prevented. (Patent Pending)
- Using the electronic thermostat and the SSR, the temperature difference's range is kept at $\pm 3^{\circ}\text{C}$.
- The SSR's electronic parts have no contact points making for durability.
- Various stackers can be used with this machine.
- This machine has a front conveyor belt which greatly increases production levels.
- The Rotary Strip Off Device can be attached as optional equipment.
- By pushing the heater control switch the temperature of the upper and lower or front and rear heater can be easily controlled. This means various materials can be used safely.
- The pressure roller is covered with a layer of silicon rubber. The upper and lower pressure rollers are completely separated when the pressure is set at 0.
- The heating plate is covered with special hard alumite, making it durable. The exchange of belts is very easy.
- The Belt Stopping Device stops the belt automatically if the belt warps therefore protecting the belt.
- The entrance of the feed in point can be adjusted easily according to the thickness of the material and interlining being used.
- An anti puckering roller is installed in this machine. This roller's position can be adjusted.
- Wing tables can be attached to the work table. When these tables are not in use, they can be folded down. (Option) The pressure is easily adjusted.
- Depending on which of the optional tables is used, various shapes can be easily pressed.

Specifications:

Model	DY-600LFS , DY-900LFS
Power Supply	Three Phase
Rated OutputHeater	12kw
Motor	295w
Fushing Width	900mm
Max.belt Speed	10.2m/min
Max.pressure	41n/cm2 (4.02kg/cm2)
Max. Temperature	195°C
Heating Time6	28sec.
Dimensions	1,200×1,490×3,300mm
Weight(approx.)	450kg
