

NG-04P

MATTRESS PALLET PACKING MACHINE

MACHINE SIZES

ADVANTAGES

- 1 This machine is very suitable for spring mattresses (especially with frames), sponge mattresses, or wholepallet packaging of compressed sponge sheets.
- 2 High production efficiency and simple operation. Simply place the top and bottom protective wooden frames, place the mattress, press it to a suitable height, and then fix it with iron sheet and iron buckles.
- 3 The cost of packaging consumables is low. After secondary compression, the mattress has a smaller volume during transportation and storage while the contorma woocen frame can effectively nrevent the mattress from rebounding due to air eakage in the compression bac, which can prevent the product from being unloaded.
- 4 The machinery has CE certification, high safety, stable performance, and convenient installation and maintenance.

TECHNICAL PARAMETER

Pressure Plate Size	2200*2430mm	油泵功率	Oil Pump Power	5.5 kw
Travel Distance	2200mm	机械净重	Weight	about 2.2 Tons
Minimum Closure Distance	900mm	机械外形尺寸	Machine External Size	W2850*L3700*H4400MM
Maximum Pressure	50 T	机械电压	Voltage	3 Phases 380V/50HZ
Oil Cylinder No.	2 Pcs			(可定制 Customized)

NG-01M, NG-06R

This model is the most economical and practical combination with the 01M and 06R.
