

ADVANTAGES

- 1 The sponge multi fold wrapping line is composed of three machines: automatic centering, automatic folding or triple folding, and automatic film pulling and rolling forming
- 2 The PLC, touch screen, frequency converter, remote module, etc used in the machinery are all well-known brands
- 3 Siemens remote control system can be added to facilitate the factory's ability to save Production capacity, which can be easily accessed through mobile apps at any time. This facilitates the storage of after-sales data, and cumulative problems and mechanical problems can be directly controlled remotely and handled in a timely manner

MACHINE SIZES

diameter range
220mm~480mm

Applicable product	Foam, Cushion
Sponge density	$\geq 25\text{kg/m}^3$, $\leq 45\text{kg/m}^3$
Efficiency	About 15 seconds per sheet
Maximum mattress size	2200*1500* 50mm
Outer diameter	50-300mm
Voltage	380V/50HZ
Power	24 KW
Weight	About 6.5 Tons
Sizes of Foamsheet- Sizes after tri-fold	2200*120mm - 750*390mm 1700*40mm - 520*240mm
Sizes of Foamsheet- Size after fold	2200*120mm - 1020*280mm 1500*40mm - 680*150mm
