

## NG-19RS

### Automatic Mattress Fold Rolling Machine

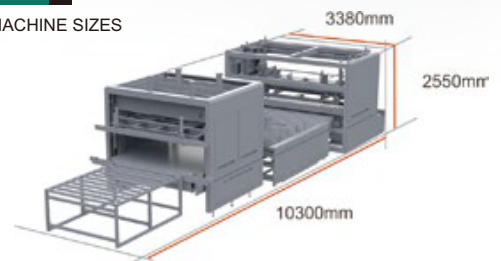

**NG-19RS** After compression it can fold the mattress to half and roll afterwards to minimize the shipping, storage and operation costs and maximize the profit and competitiveness.

#### ADVANTAGES

**NG-18RS** helps the mattress manufacturers to reach the roll up packing process , reduce shipping cost per unit , or create an excellent package for direct-to-consumer and retail markets.

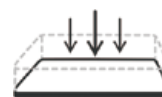

- 1 Mattress compressing machine ( Dress mattress up by PE bag, after pressing, welding and auto transmit)
- 2 Auto mattress folding and rotating
- 3 Roll packing machine , Setting the roll packaging diameter according to requirement depend on the different sizes mattress.
- 4 Packaging Cost Saving , For the front compress machine used 0.09mm thickness compression bags ,and the last roll packing machine used 0.04mm thickness film.
- 5 Siemens control system(PLC,HMI,Inverter)The control panel can be translated into various languages and is equipped with a remote system for easy installation and maintenance.

MACHINE SIZES

**diameter range  
220mm~480mm**

FUNCTIONS

Compressing

Folding

Rolling

#### TECHNICAL PARAMETER

|                         |                 |                           |                       |
|-------------------------|-----------------|---------------------------|-----------------------|
| Maximum Mattress Size   | 2200x2000 MM    | Suitable Plastic material | PE Plastic            |
| Maximum Mattress Height | 450 MM          | Air pressure              | 0.6 - 0.8 MPa         |
| Roll diameter range     | 220 MM - 480MM  | Net weight                | 9000 KG               |
| Maximum Pressure        | 100T            | External Dimension        | L103000*W3380*H2550MM |
| Efficiency              | 30 Seconds /PCS | Voltage                   | 3 Phases 380V/50HZ    |
| Total Power             | 33.6 KW         |                           | (Customized)          |
