

NG-29RL

All Automatic Mattress Multi Fold Compression & Roll-packing Machine Line

MACHINE SIZES

Straight Roll-packing

Folded Roll-packing

Tri-folded Roll-packing

OUTER DIAMETER(ADJUSTABLE)
220~480MM

TECHNICAL PARAMETER

Voltage	AC 380V/50Hz	Oil cylinders	4 pcs
Pressure plate size	2300*2260 mm	Outer diameter (adjustable)	220~480 mm
Maximum mattress size	2200*2000 mm	Efficiency	35s /sheet
		Power	About 52KW
Mattress height	≤450 mm	Machine Sizes	L 16000*W3600*H3100 mm
Maximum lift	500 mm	Net weight	18 tons

Pressure 60T (standard)

ADVANTAGES

- 1 NG-29RL can be folded in half or three folds of the mattress, through accurate folding and rolling, the shape of the mattress is more regular, not only to improve the beauty of the product, but also to further save space. At the same time, this packaging method can also effectively protect the mattress, reduce damage during transportation and storage, and ensure the integrity and quality of the product.
- 2 Can complete a large number of mattress compression folding and rolling work in a short time, thus greatly improving production efficiency. For mattress manufacturers, this means being able to respond more quickly to market demand, improve customer satisfaction, and stand out in the fierce market competition.
- 3 This machine also has excellent stability and durability. After precise design and manufacture, it can run stably for a long time, reduce failure and downtime, and save a lot of maintenance costs for manufacturers. At the same time, its rugged characteristics also ensure a long service life, creating lasting value for manufacturers.
