

NG-30RL

All Automatic Mattress Multi Fold Compression & Roll-packing Packaging Machine Line

MACHINE SIZES

Plastic Film Packing

Straight Roll-packing

Folded Roll-packing

Tri-folded Roll-packing

OUTER DIAMETER(ADJUSTABLE)
220~480MM

TECHNICAL PARAMETER

Voltage	AC 380V/50Hz	Oil cylinders	4 pcs
Pressure plate size	2300*2260 mm	Outer diameter (adjustable)	220~480 mm
Maximum mattress size	2200*2000 mm	Efficiency	35s /sheet
		Power	About 52KW
Mattress height	≤450 mm	Machine Sizes	L19500*W3800*H3100 mm
Maximum lift	500 mm	Net weight	20 tons

Pressure 60T (standard)

1 The NG-30RL is a highly efficient mattress compression and rolling machine designed specifically for mattress manufacturers. It offers multiple packaging options, including standard film packaging and compressed roll packaging, and can fold mattresses in either two or three sections. With precise folding and rolling, the machine ensures a more uniform mattress shape, enhancing the product's appearance and significantly saving storage and transportation space. Additionally, this packaging method effectively protects the mattress, reducing damage during transportation and storage, and ensuring the integrity and quality of the product.

2 The NG-30RL is highly efficient, capable of completing large volumes of mattress compression and rolling in a short time, greatly improving production efficiency. For mattress manufacturers, this means a quicker response to market demands, increased customer satisfaction, and a competitive edge in a fierce market.

3 Moreover, the machine boasts exceptional stability and durability. Its precise design and manufacturing ensure long-term, stable operation, minimizing downtime and maintenance costs for manufacturers. The robust and durable characteristics of the NG-30RL guarantee a long service life, creating lasting value for manufacturers, making it an indispensable piece of equipment in mattress production.
