

NG-51MS

Full Automatic Mattress Packaging Machine

NG-51MS with the function of automatic wrapping , heat sealing and cutting f ilm . It is the best packing equipment for saving workers and time for mattress factories.

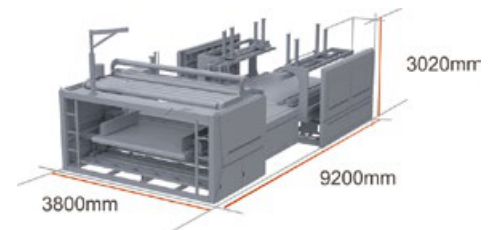

ADVANTAGES

- 1 Be suitable for just standard lfn packing no compression for the mattress, foam, collmat. Bed base Foam lavers.
- 2 Matching use with the production line to fullfill automatic production.
- 3 High production efficiency , sealing solidly and Look beautiful.
- 4 It is the best to be connected to the palletizer, stacking the packaged mattress on the pallets.
- 5 The machinery has CE certification and high safety. It uses Siemens PLC control system and electrica components, with stable performance. The contro panel can be translated into various languages and is egiupped with a remote svstem for easy installation and maintenance.

The mattress passes through the entrance and is covered with f ilm on the top and bottom, and then is completely wrapped and tightly sealed by a three sided heat sealing device.

MACHINE SIZES

TECHNICAL PARAMETER

Mattress Width	800-2200 mm	Packaging Materials	PE plastic film
Mattress Length	1800-2100 mm	Machine Total Power	18 kw
Mattress Height	50-400 mm	Machine External Size	L9200 * W3800 * H3020 mm
packing Speed	2 pcs/min	Weight	5000 kg
PE film width	≤2950 mm	Voltage	3 Phases 380V/50Hz
Air pressure	0.8MPa; 0.78 M³/Hour		(Customized)
