IRON HEAVY

Unrivalled performance, when Power Encounters Innovation

IRON HEAVY, a member of the FKgroup's IRON family, represents the pinnacle of cutting technology for resistant materials. Designed specifically for industry and the clothing sector, this automatic cutting machine stands out for its exceptional performance and state-of-the-art technology.

It is the epitome of efficiency, guaranteeing superior cutting quality and unprecedented productivity. This machine is the ideal solution for companies looking for a reliable partner to handle large production volumes with precision and speed.

ADVANCED TECHNOLOGY AND FLExIBILITY

With a cutting head designed for medium thicknesses, IRON HEAVY is a jewel of engineering, incorporating the most advanced technology. IRON HEAVY adapts to different production requirements, offering a choice of SIEMENS or FANUC control systems, both available with or without continuous cutting software. This flexibility allows perfect adaptation to different cutting operations. The robust structure in reinforced steel and aluminium, along with the coolable rotary mass system and square ball recirculation guides, guarantees lasting and reliable performance with unmatched cutting precision.

IRON HEAVY is more than a machine; it is a promise of efficiency, quality and innovation for all kinds of resistant materials. It is the ideal solution if you are looking for excellence in the cutting of resistant materials.

Offering a unique combination of power, precision and flexibility, IRON HEAVY is a smart investment for companies aiming to stay ahead in today's competitive market. Choosing IRON HEAVY means opting for innovation, reliability and flexibility in automatic cutting, with guaranteed exceptional results on all types of material.

SPECIFICATIONS AND FEATURES:

- blade with 6000 rpm;
- maximum linear speed of 100 m/minute;
- blade kit for different types of fabric;
- alternating blade cooling and lubrication system with switch;
- double 11 kW turbines or 4 x 5.5 kW turbines (longer machine).

Working Area A x L (cm)	180 x 170	200 x 170	220 x 170	180 x 240	200 x 240
Overall dimensions L x W x H (cm)	470 x 290 x 220	470 x 310 x 220	470 x 330 x 220	592,3 x 290 x 220	592,3 x 310 x 220
Weight (Kg)	2880	2960	3040	3220	3300
Installed Power (kW)	14	14	15	15	15
Average Consumption (kW)	5,9	5,9	5,9	6,2	6,2
Power supply Tension	400V±10%				
Max compressed lay height (cm)	approx. 6 cm, depending on the technical characteristics of the material				

With the aim of improving its machinery FKgroup reserve the right to change the technical characteristics without prior notice.

Average power consumption 5.9kW

IRON HEAVY Denim Edition

Production Capacity and Precision Denim Cutting

The DENIM version of IRON HEAVY sets a new standard in denim cutting. Thanks to a capacity of up to 1200 jeans per hour, this machine meets the needs of the largest denim manufacturers, guaranteeing fast, precise cutting of uniform quality.

FKgroup's experience and innovation in the denim sector is reflected in every aspect of IRON HEAVY: a fast, precise and efficient cutting process with consistently high cutting quality.
